Education

SENA (Servicio Nacional de Aprendizaje) Dosquebradas, Risaralda, Colombia
Technologist in Software Analysis and Development *Jul. 2024 – Oct. 2026*

Experience

FullStack Developer Trainee (college trainee) April 2026 – October 2026
Globant *Pereira, Colombia*

- Designed and developed backend services and REST endpoints for a multi-agent search engine and an AI benchmarking platform using Python, FastAPI, and PostgreSQL.
- Structured HTTP data flows and processing logic to efficiently integrate with frontend applications developed in React and TypeScript.
- Defined and implemented technical requirements using Spec-Driven Development methodology and Agile/Scrum practices for internal innovation products.

Projects

GeDocs | *React, Laravel, MySQL, DigitalOcean, Dokploy* July 2024 – April 2026

- Built a platform for managing citizen requests with a Drive-style filing system, developing the interactive visual interface using React and JavaScript.
- Ensured system reliability by implementing a comprehensive suite of unit tests, covering the frontend with Vitest and the backend with PHPUnit.
- Deployed the project to production on DigitalOcean infrastructure using containerized deployment with Dokploy.

Technical Skills

Languages: Python, JavaScript, PHP, TypeScript, SQL (MySQL, PostgreSQL), HTML/CSS
Frameworks: React.js, Node.js, Laravel, FastAPI, Wordpress
DevOps & Cloud: Docker, AWS, Jenkins, Terraform, Dokploy, DigitalOcean, Linux
Developer Tools & QA: Git, GitHub, Jira, Figma (UI/UX Mockups), Vitest, PHPUnit
